EXECUTIVE PROFILE

Analytics Engineering and AI Automation professional with 5+ years of experience designing scalable reporting and data-automation solutions across healthcare, finance, CRM, and enterprise analytics environments. Builds data pipelines, semantic models, and executive reporting systems using Power BI, SQL, Python, Excel, Power Query, and AI-assisted workflow design — translating raw operational and AI-operations data into governed, decision-ready platforms. Trusted to lead data-quality initiatives, design intelligent process-automation workflows, and raise team data accuracy to a sustained 98% across complex reporting environments.

5+ YEARS Analytics & data quality	98% Team data accuracy	C-SUITE Reporting exposure
---	----------------------------------	--------------------------------------

CORE EXPERTISE

Analytics Engineering	Data Pipeline Design	ETL Concepts	Data Modeling
Semantic Modeling	Business Intelligence Architecture	Dashboard Architecture	Solution Design
Workflow Automation	AI-assisted Automation	Power Query	DAX
Business Intelligence	Enterprise Reporting	Enterprise Analytics	Executive Dashboards
Executive KPI Design	KPI Monitoring	Data Governance	Data Validation
Reporting Automation	Commercial Analytics	Financial Reporting	Operational Reporting
Data Visualization	Root-Cause Analysis	Process Improvement	Stakeholder Management
Team Leadership			

PROFESSIONAL EXPERIENCE

Lead Data Quality Analyst | Sep 2025 – Jul 2026

N2S Global Workforce Solutions LLC · Contract

- Led end-to-end Salesforce customer-entity validation, strengthening data governance, mapping integrity, and structural control across the Atlassian engagement.
- Raised team data accuracy to a consistent 98% through cross-functional calibration, structured coaching, and performance feedback.
- Diagnosed systemic discrepancies through QA audits and root-cause analysis, enabling faster remediation and more consistent reporting.
- Aligned project stakeholders on data-quality priorities, CRM health standards, and process-improvement actions.
- Led enterprise-level data validation initiatives supporting CRM governance and operational reporting.
- Designed structured quality assurance workflows and reporting standards that improved consistency and stakeholder confidence.
- Supported continuous process improvement through analytics, automation opportunities, and governance best practices.

TECHNOLOGIES Salesforce · CRM Validation · QA Auditing · Operational Reporting · Data Governance

Senior Data Analyst | May 2024 – Aug 2025

Vector Outsourcing Solutions Philippines Inc.

- Engineered daily, weekly, and monthly KPI reporting that improved consistency and enabled faster operational decisions.
- Automated manual Excel and internal-system workflows, reducing reporting effort, shortening turnaround time, and limiting processing error.
- Converted medical-billing, insurance, and accounts-receivable data into financial and operational reporting for management planning.
- Partnered with QA and operations leaders to validate performance data, identify trends, and drive process improvements.

TECHNOLOGIES Advanced Excel · Reporting Automation · KPI Monitoring · AR Analysis

Business Analyst | Feb 2023 – Apr 2024

JACCS Finance Philippines Corp.

- Analyzed financial and industry KPIs to surface trends and support revenue-oriented business propositions.
- Advised C-suite leaders through executive reports, competitive research, and strategic presentation decks.

- Standardized cross-department data collection by coordinating stakeholders around shared business goals and reporting requirements.

TECHNOLOGIES Excel · Google Sheets · Financial Analysis · Executive Presentations

AI Data Quality Specialist | Apr 2021 – Feb 2023

Appen

- Evaluated AI training datasets, metadata quality, and search relevance across multiple AI programs, ensuring dataset integrity and consistent operational quality.
- Performed structured data validation, metadata auditing, and quality assurance using established evaluation frameworks, translating findings into quality reports and improvement recommendations for program stakeholders.
- Analyzed quality trends, identified recurring issues, and collaborated with cross-functional stakeholders to improve annotation consistency and operational efficiency.
- Supported data governance initiatives through root-cause analysis and continuous process improvement — early groundwork for the data-quality and business-intelligence work that followed.

TECHNOLOGIES AI Data Operations · Metadata QA · Data Validation · Quality Reporting · Root-Cause Analysis

FEATURED ENTERPRISE PROJECTS

Enterprise Sales Intelligence Platform (ESIP)

Designed a modular, configuration-driven enterprise sales & operations dataset platform — a Python-generated Kimball star schema modeling a \$350M B2B manufacturer — with data-validation rules and a full Power BI reporting layer (ETL, data modeling, DAX, executive dashboards) for large-scale operational reporting.

Python · Power BI · Data Validation · Configuration-driven Architecture · Enterprise Reporting · Dashboard Design

Executive Sales Performance Dashboard

Interactive Power BI dashboard for sales, profitability, product, and regional performance — built with Power Query ETL, a custom DAX measure library, executive KPI cards, slicers, and drill-through views for regional and product-level analysis.

Power BI · Power Query · DAX · Executive KPIs · Interactive Dashboards · Drill-through · Regional Analysis

AI-Assisted Product Information Management Platform

Designed the solution architecture, data model, AI-pipeline, and governance framework for an AI-assisted Product Information Management (PIM) concept — automating supplier product identification, metadata extraction, and Shopify listing workflows with human-in-the-loop review and full audit history. Solution-design phase complete; prototype build planned next.

AI-assisted Workflow Design · Solution Architecture · Google Drive Integration · Shopify Integration Design · Data Governance · System Design

Commercial Analytics Dashboard

Executive dashboard analyzing revenue, gross profit, net profit, promotions, channels, products, and country performance.

Python · Pandas · Plotly · Streamlit · Executive Reporting · Business Insights

TECHNOLOGY STACK

AUTOMATION & SYSTEMS Automation · Apps Script · Configuration-driven Systems · AI-assisted Development · Salesforce

DATA & ANALYTICS SQL · PostgreSQL · Python · Pandas · NumPy · Excel · Google Sheets

BUSINESS INTELLIGENCE Power BI · Power Query · DAX · Dashboard Design · Semantic Models · Data Modeling · Executive Reporting

TOOLS & COLLABORATION Git · GitHub · VS Code · Jira

EDUCATION

Bachelor of Science in Entrepreneurship

NBS College, Quezon City · 2018–2022

Magna Cum Laude · Pioneer Valedictorian · CGPA 3.80

Former President and Event Management Chairman, Student Entrepreneurs' Society

PROFESSIONAL DEVELOPMENT

IN PROGRESS

Google Advanced Data Analytics Professional Certificate

DataCamp SQL & Analytics Training

COMPLETED CERTIFICATIONS

IBM Business Intelligence Professional Certificate — Completed, Jul 2026

Data Engineering Philippines Scholar — 2025
